## SUMMARY

A passionate Computer Science Engineering student with hands-on experience in full-stack development. Experienced in working closely with founders to ideate product improvements and gather client feedback. Skilled in project management, problem-solving, and technical implementation. Seeking to leverage my skills and passion for technology in dynamic and growth-oriented environments.

## SKILLS

- **Back-End Development:** Spring Boot, Java, Node.js, Express.js
- **Front-End Development:** React.js, React Native, HTML, CSS, JavaScript (ES6+), Bootstrap
- **Database & Storage:** MySQL, MongoDB
- **Mobile Development:** Android (Java), iOS (Swift)
- **Technical Expertise:** Debugging, Analytical Thinking, Problem-Solving
- **Project Management:** Project Coordination, Timely Delivery, Task Prioritization
- **Additional Skills:** Team Collaboration, Competitor Analysis, Client Relations

## EXPERIENCE

### Full Stack Developer

PHPD Hiring & Staffing Private Limited, Pune, Maharashtra

January 2024 – March 2025

- Designed and implemented user interfaces using React.js for front-end development, delivering responsive and intuitive user experiences.
- Developed server-side logic and APIs using Node.js and Express.js, ensuring efficient data processing and seamless client-server communication.
- Managed data storage and retrieval operations through MongoDB, optimizing database queries for improved application performance.
- Wrote reusable, scalable, and efficient code for both front-end and back-end systems, maintaining high code quality standards.
- Demonstrated excellent technical and analytical skills while meeting project deadlines with strong commitment to team collaboration.

### Software Development Engineer

Brillio, Bengaluru, Karnataka

March 2022 – September 2023

- Spearheaded the development and optimization of React.js UI components for Building Management System (BMS-SIRIUS), resulting in reduced long-term maintenance costs and improved system efficiency.
- Architected seamless full-stack communication by integrating robust Node.js APIs with React frontend, enabling real-time data synchronization.
- Drove significant application performance improvements, achieving a 20% reduction in page load times through targeted code optimization and rendering enhancements.
- Refactored extensive legacy codebases, significantly improving overall system scalability, maintainability, and code quality.

## EDUCATION

---

### POST GRADUATE DIPLOMA IN MOBILE COMPUTING (PG-DMC)

CDAC Sunbeam Institute of Information Technology, Pune

Aug 2025 – Feb 2026

### BACHELOR OF TECHNOLOGY – B-TECH: ELECTRONICS AND TELECOMMUNICATION ENGINEERING

Shri Shivaji Institute of Engineering and Management Studies, Parbhani, Maharashtra.

2017-2021

## PROJECTS

---

#### **HireWrite - AI Job Board** | CDAC Sunbeam PG-DMC Project

- Full-stack platform with Web Apps, iOS/Android Apps for seamless cross-platform access
- **Student Features:** Profile creation (resume upload/builder), job applications across all platforms
- **Company Features:** Multi-user company profiles, AI-generated job descriptions, intelligent candidate matching
- **Admin Dashboard:** User/company verification, fake account removal, job analytics
- [Git Repo](#)

## ACTIVITIES

---

- Participated in the Hackathon organized by CDAC Sunbeam Pune during my PG-DMC course and successfully completed it and won the Hackathon.
- Collaborated with peers to brainstorm, design, and prototype a functional solution under time constraints, demonstrating effective teamwork and problem-solving skills.
