Mahesh Samale

Blending Logic & Imagination | Lifelong Learner | Engineering Ideas into Reality

Pune, Maharashtra, India

Summary

Hello! I'm Mahesh Samale, a mobile and full-stack developer who loves turning ideas into working applications. Currently, I'm pursuing a Post Graduate Diploma in Mobile Computing (PG-DMC) at Sunbeam Institute of Information Technology, Pune, alongside my BTech in Computer Science.

I build Android apps in Java, iOS apps using Swift and Storyboards, and cross-platform apps with React Native, backed by RESTful APIs using Java/Spring Boot, Node.js, Express, and MySQL. Recently, I led a team of two and won a Sunbeam Hackathon by delivering a production-ready Blog Management System in just 6 hours.

Previously, I worked at JobOffers (Safhire.ai) as an IT Sales Specialist and Full Stack Developer Intern, where I helped HR consultants and startups adopt tech solutions and improved the platform's UX with React.js. This mix of business and engineering experience helps me understand users, ship features fast, and communicate clearly with both technical and non-technical teams.

I'm now looking to contribute as a Mobile Developer, Full-Stack Developer, or Backend Developer, focusing on clean code, secure authentication, and scalable architectures while continuously learning and improving.

Experience

Safhire.ai (Previously Joboffers)

1 year 1 month

IT Sales Specialist

November 2023 - November 2024 (1 year 1 month)

Gurugram, Haryana, India

Drove revenue growth by introducing JobOffers to HR consultants and startup founders.

Built strong relationships with clients and customized solutions to meet their needs.

Ensured smooth integration of JobOffers into clients' recruitment processes.

Consistently met or exceeded sales targets, showcasing JobOffers' value for modern hiring.

Stayed updated on industry trends and shared insights with clients for better decision-making.

Continuously learned about new features and best practices to provide the best solutions.

Full Stack Developer
August 2024 - September 2024 (2 months)
Gurugram, Haryana, India

During my time as a Full Stack Developer Intern at JobOffers, I focused mainly on front-end development using React.js. I had the opportunity to design and build user-friendly interfaces, working closely with the team to make sure the platform was smooth, responsive, and easy to navigate.

Through this role, I learned how to create efficient and effective front-end solutions, improving both the look and functionality of the product. It was a great experience that enhanced my technical skills, problem-solving abilities, and teamwork, while contributing to a live, growing product.

Education

SunBeam Institute of Information Technology, Pune-Karad
Post Graduate Diploma in Mobile Computing, Mobile Computing · (August 2025 - February 2026)

Dr. Babasaheb Ambedkar Technological University
Bachelor of Technology - BTech, Computer Science · (January 2021 - June 2025)
